

2020-2021 Cancer Registry & Surveillance Webinar Series

Prostate 2020

10/1/20

Wilson Apollo, CTR, Radiation Therapist

Jim Hofferkamp, CTR

This 3-hour class will present the following information for prostate: anatomical information needed to abstract and code the cases; how to determine the number of primary tumors; how to code topography and histology; how to code the stage data items; and the treatment. We will have a special emphasis on coding radiation.

Lung 2020

11/5/20

Denise Harrison, CTR

Kelli Olsen, MS, CTR

This 3-hour class will present the following information for lung: anatomical information needed to abstract and code the cases; how to determine the number of primary tumors; how to code topography and histology; how to code the stage data items; and the treatments and how to code them.

Thyroid 2020

12/3/20

Melissa Riddle, CTR Trainer and CTR

Jim Hofferkamp, CTR

This 3-hour class will present the following information for thyroid: anatomical information needed to abstract and code the cases; how to determine the number of primary tumors; how to code topography and histology; how to code the stage data items; and the treatment

Treatment 2021

1/7/21

Wilson Apollo, CTR, Radiation Therapist

Jennifer Ruhl, Chair SSDI WG, Public Health Analyst NIH/NCI SEER

This 3-hour class will focus on coding treatment. A special emphasis will be placed on coding radiation and the new data items used to collect neoadjuvant treatment.

Lymphoma 2021

2/04/21

Jim Hofferkamp, CTR

This 3-hour class will present the following information for Lymphomas: anatomical information needed to abstract and code the cases; how to determine the number of primary tumors; how to code topography and histology; how to code the stage data items; and the treatment

Abstracting and Coding Boot Camp 2021

3/4/21

Patrick Stevens, CTR

Jim Hofferkamp, CTR

This 3-hour class will involve completing multiple quizzes that focus on core concepts of casefinding and abstracting. There will be minimal lecture.

Larynx 2021

4/1/21

Denise Harrison, CTR

Louanne Currence, RHIT, CTR

This 3-hour class will present the following information for larynx: anatomical information needed to abstract and code the cases; how to determine the number of primary tumors; how to code topography and histology; how to code the stage data items; and the treatments and how to code them

Pancreas 2021

5/6/21

Jim Hofferkamp, CTR

This 3-hour class will present the following information for pancreas: anatomical information needed to abstract and code the cases; how to determine the number of primary tumors; how to code topography and histology; how to code the stage data items; and the treatments and how to code them.

Kidney 2021

6/17/21

Denise Harrison, CTR

Louanne Currence, RHIT, CTR

This 3-hour class will present the following information for kidney anatomical information needed to abstract and code the cases; how to determine the number of primary tumors; how to code topography and histology; how to code the stage data items; and the treatments and how to code them.

Quality in CoC Accreditation

7/8/21

Courtney B. Jagneaux, RHIA, CTR

Erin Weber, CTR

This 3-hour class will cover all of the 2020 Commission on Cancer standards that encompass quality. This includes standards 6.1 Cancer Registry Quality Control, 7.1 Accountability and Quality Improvement Measures, 7.2 Monitoring Concordance with Evidence-Based Guidelines, and 7.3 Quality Improvement Initiative.

Breast 2021

8/5/21

Vicki Hawhee, M. Ed, CTR

Jim Hofferkamp, CTR

This 3-hour class will present the following information for breast: anatomical information needed to abstract and code the cases; how to determine the number of primary tumors; how to code topography and histology; how to code the stage data items; and the treatments and how to code them.

Coding Pitfalls 2021

9/02/21

Janet Vogel, CTR

Jim Hofferkamp, CTR

This 3-hour class will address coding dilemmas identified through quality control of registry data and present solutions with rationale for determining the number of primary tumors using the Solid Tumor Rules; assigning ICD-O-3 topography and histology codes using the ICD-O-3 Manual and Solid Tumor Rules; completing the stage of disease data items using AJCC Cancer Staging Manual, 8th Edition and Summary Stage 2018; and completing treatment data items as required by all standard setters.
